Individual Notes:

The Dolores litter is confident and self-assured after a little time to adjust to new situations. They react appropriately to new sights and sounds, including those that might be considered startling. These puppies have good memory, focus, and problem-solving abilities appropriate for their age and stage of development. They also have good motivation for interaction, food, and toys at balanced levels. They are socially appropriate in their interactions with one another, other dogs and people. They are very playful and can be a bit pushy, sometimes being a little vocal to get your attention, but this

behavior is easily managed and redirected. They rarely use their mouths to initiate or engage in play, and when they do, they have excellent bite inhibition.

These puppies have no red flags and show no possessiveness. They are comfortable and tolerant of handling and restraint, actively seeking out this type of interaction.

White Dot, Orange and Pink Dot have mid to moderate energy. The rest of the litter has moderate energy.

Overall, these puppies are very social, curious, playful, and happy. They are gentle and respectful initially in interactions, but once they adjust, they become very eager and engaging. They are very tolerant of all types of interaction and can be a little wiggly due to excitement. These puppies are well-balanced and will fit well into most any home.

Health notes:

Red Dot has an Underbite.
