### Maeve Girls Litter Overview:

The Maeve girls are a fun, playful group who need a little time to warm up in new environments. Once adjusted, they are eager to explore, play, and interact with one another, making them a joy to watch! These girls have mid to mid-moderate energy levels and play well together. While Pink and White are a bit more active during handling, Red is especially calm and enjoys close contact. They all bring a unique personality to the litter.
