### Naomi Girl Litter Overview:

The Naomi girls are a loving and sweet group of puppies who came in observant and ready to connect. They are naturally people-oriented and will work hard to gain your attention. With their playful and engaging personalities, these girls bring plenty of joy and affection. Red, White, and Pink Dot share very similar temperaments, often sticking together and playing harmoniously. Pink is a bit more baby-like and snuggly than her sisters. Overall, these puppies have a moderate energy level, with Pink leaning slightly lower, and they should transition well into most home types.
