### Valentine Girls Overview:

The Valentine girls are naturally confident, self-assured, and happy-go-lucky puppies. They are vibrant, playful, and have engaging personalities that make them a joy to watch. Pink and Red have moderate energy levels, while White has a mid to moderate energy level. Pink and Red can be slightly rough in play with each other, but they redirect easily. These girls are adaptable and will thrive in homes that match their unique personalities.

### Health Notes:

- None
- 

### Valentine **Pink**

- **Energy Level:** Moderate
- **Personality:** Pink is a confident and playful puppy with a curious and explorative nature. She loves toys and is highly motivated by play rather than human interaction. Her silly and fun-loving demeanor makes her a delightful addition to a home that values her independence and curiosity. Pink's natural confidence ensures she will adapt well to her new environment. No red flags were noted.

### Valentine **Red**

- **Energy Level:** Moderate
- **Personality:** Red has a big personality that matches her confidence and self-assurance. She enjoys engaging with toys and her littermates and is vocal when trying to initiate play with people, which adds to her charm. Red's high drive for play makes her a great match for a family that can provide plenty of interaction and structured activities. Her playful and silly personality makes her a fun and entertaining companion. No red flags were noted.

## Valentine White

- **POTENTIAL THERAPY CANDIDATE**

- **Energy Level:** Mid to moderate
- **Personality:** White is a gentle and sweet puppy who started off a bit apprehensive but warmed up as she felt safe. She prefers to stay close to people and finds comfort in affection and reassurance. While she may whine slightly when unsure, this is likely to diminish as her confidence builds. Her calm, affectionate nature and people-oriented personality make her an excellent therapy candidate and a loving addition to a nurturing home. No red flags were noted.
