Chevelle Litter Temperament Overview:

The Chevelle litter overall is confident and self-assured. They showed little to no stress in new situations, around new people, or in circumstances typically considered stressful. These puppies reacted appropriately to new sights and sounds. They were curious and investigative. These puppies overall have a good memory, focus, and problem-solving abilities average to their age and stage of development; although there was some variance in between individual puppies that will be noted in the individual notes. These puppies have very good motivations for interaction, food, and toys. All of them preferred interaction as their form of motivation. These puppies were all socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They did use their mouth quite a lot to initiate and/or engage in play, but have excellent bite inhibition. These puppies were rarely vocal. They were all comfortable and tolerant of handling and restraint. These puppies have no red flags and show no possessiveness.
