Faryn Litter Temperament Overview

The Faryn litter overall is confident and self-assured with the exception of red dot, who is quite timid and needs time to adjust into a new situation. The rest of the litter shows little to no stress in new situations, around new people, or in circumstances typically considered stressful. They react appropriately to new sights and sounds. They are curious and investigative. These puppies have good memory, focus, and problem-solving abilities average to their age and stage of development. They also have good motivations for interaction, food, and toys at fairly equal and balanced levels. These puppies are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people, although blue can be a bit pushy in his effort to get and keep your attention as can pink also. These puppies do use their mouth somewhat to initiate or engage in play, but have very good bite inhibition. These puppies have no red flags and show no possessiveness. These puppies have subtle differences between them.
