### Noodle Litter Temperament Overview

The noodle litter overall is confident and self-assured after a little time to adjust into a new situation. They needed very little time to adjust very well. They show little to no stress in new situations, around new people, or in circumstances that are typically considered stressful. These puppies have good memory, focus, and problem-solving abilities average to their age and stage of development. These puppies have excellent motivations for interaction, food, and toys. Their motivations for interaction is highest; food would be second. These puppies are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They do use their mouth somewhat to initiate or engage in play but have excellent bite inhibition. These puppies have no red flags and show no possessiveness. They all have moderate energy and are very similar when comparing them. Any of these puppies have good potential for therapy work.

---

### Noodle Blue

#### POTENTIAL THERAPY CANDIDATE

- **Energy Level:** Moderate
- **Personality:** Blue is very playful, silly, and happy. He uses his mouth to try and get you to interact with him, but is gentle. He is content to explore and play on his own while still being very personable and engaging. His focus tries to be on everything all at the same time. He has good potential for therapy work.
- **Health Notes:** none noted
