### Edith Boys Temperament Overview:

The Edith litter overall is very confident and self assured. They show little to no stress in new situations, around new people, or in circumstances that are typically considered stressful. These puppies overall react appropriately to new sights and sounds. They are curious and investigative of sights and sounds that should be considered startling. These puppies have very good memory, focus, and problem-solving abilities above average for their age and stage of development. They have excellent motivation for food, interaction, and toys at fairly equal and balanced levels. These puppies are socially appropriate in their interactions with one another, with cats, and with dogs, although a couple of puppies can be a little on the assertive side. This is noted in the individual notes. These puppies are also socially appropriate in their interactions with people. They do use their mouth to initiate and engage in play, but have a good bite inhibitions. A few of the puppies are vocal in socially appropriate situations, but it is easily managed and or redirected. These puppies have no red flags and show no possessiveness overall they are fairly consistent.
