Elana Girls Temperament Overview:

The Elana litter overall is very confident and self-assured unless otherwise noted. They show no stress in new situations, around new people, or in circumstances typically considered stressful. These puppies are curious and investigative with new sights and sounds including those that should be considered startling. These puppies have very good motivations for interaction and food and toys. They have good memory, focus and problem-solving abilities above average for their age and stage of development. These puppies are socially appropriate in their interactions with one another, with cats, and other dogs. They are also socially appropriate in their interactions with people.

They do use their mouth somewhat to initiate or engage in play, but have excellent bite inhibition. They are rarely vocal, when they do it is socially appropriate, and easily managed and or redirected. Blue does vocalize in his effort to get or keep your attention. But it is easily managed and redirected as well. These puppies have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint, actively seeking out this type of interaction. Overall, these puppies are well balanced, and fairly consistent
