### Madonna Boys Temperament Overview:

The Madonna litter overall is confident and self-assured unless otherwise noted. They show little to no stress in new situations, around new people, or in circumstances typically considered stressful. These puppies are curious and investigative with new sights and sounds, including those that should be considered startling. They have good memory, focus, and problem-solving abilities above average for their age and stage of development. They also have very good motivations for interaction, food, and toys.

They are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. They do use their mouth somewhat to initiate or engage in play, but have excellent bite inhibition. These puppies can be vocal in socially appropriate situations, but it is easily managed and redirected. These puppies have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint.
