Merlot Boys Temperament Overview:

The Merlot overall needed time to adjust to new situations. They showed some stress in new situations, around new people, and in circumstances that are typically considered stressful. These puppies did startle with loud sounds and sudden sights, but they do recover on their own. These puppies have good memory, focus, and problem-solving ability average to their age and stage of development. These puppies also have good motivations for interaction, food, and toys at fairly equal and balanced levels.

These puppies overall are socially appropriate in their interactions with one another, with cats, and with other dogs. They are also socially appropriate in their interactions with people. These puppies skewed towards being naturally gentle and respectful. They were all comfortable and tolerant of handling and restraint. They are also rarely vocal. Over all these puppies had no red flags and showed no possessiveness.

Merlot Orange

- **Energy Level:** Mid but could turn into Mid to Moderate
- **Personality:** Orange is quite timid and did not adjust during the course of the test. His energy level appears low, but this is gonna be inaccurate due to the fact that he was too unsure to do much. I would recommend Prep school for this puppy to work on confidence building prior to adoption.
- **Health Notes:** NA
