These puppies show little to no stress in new situations, around new people, or in circumstances typically considered stressful. These puppies are curious and investigative with new sights and sounds. They do startle, but recover very quickly and on their own. These puppies have excellent motivation for interaction and good motivation for toys and food. These puppies have good memory, focus, and problem-solving abilities, average to their age and stage of development.

These puppies are socially appropriate in their interactions with one another, with cats, and other dogs. They are also socially appropriate in their interactions with people. They do use their mouth to initiate and engage in play, but have excellent bite inhibition. Orange Dot tends to vocalize when left alone while the rest of the litter is rarely vocal. They all actively seek out interaction and are very calm and gentle with handling. These puppies are fairly consistent.
