Zadie Girls Temperament Overview:

The Zadie litter overall is confident and self-assured. They needed very little time to adjust into new situations. They show little to no stress in new situations, around new people, or in circumstances that are typically considered stressful. These puppies are curious and investigative with new sights and sounds including those that should be considered startling. These puppies have very good memory, focus, and problem-solving abilities, slightly above average for their age and stage of development. They indicate a readiness for potty training.

These puppies have very good motivation for interaction and food and have a very good interest in toys. They are socially appropriate in their interactions with one another, with cats and with other dogs. They are also socially appropriate in their interactions with people. They do use their mouth somewhat to initiate or engage in play, but have excellent bite inhibition and they are rarely vocal. They have no red flags and show possessiveness. Overall, these puppies are fairly consistent.
