Livie Litter Temperament Overview:

The Livvy litter overall is confident and self assured. They show little to no stress in new situations, around new people, or in circumstances typically considered stressful. They react appropriately to new sights and sounds including those that should be considered startling. These puppies are curious and investigative. They are socially appropriate in their interactions with one another, with cats, and with other dogs, they are also socially appropriate in their interactions with people.

They do use their mouth somewhat to initiate or engage in play but have excellent bite inhibition. These puppies are rarely vocal. These puppies have no red flags and show no possessiveness. They are all comfortable and tolerant of handling and restraint. Overall, any puppy in this litter has good potential for therapy work. They are all very well, balanced, social, eager, and engaging.
