Molly Boys Video

### Molly Boys Temperament Overview:

The Molly boys are confident, self-assured, and adaptable puppies. They show little to no stress in new situations, whether around new people or in circumstances typically considered stressful. They are curious, investigative, and responsive to new sights and sounds. These boys are well balanced, demonstrating average memory, focus, and problem-solving skills for their age and stage of development. They are socially appropriate with people, other dogs, and cats. Both boys are comfortable with handling and restraint, rarely use their mouths during play, and have excellent bite inhibition. They are rarely vocal and show no signs of possessiveness or red flags.

### Molly **Blue** - Breeder's Pick ; Enrolled into S.T.A.R program

- **Prep School Dates:** 5.8.25 - 7.3.25 (8WK)
- **Energy Level:** Mid to Moderate
- **Personality:** Blue is well balanced, confident, and naturally curious. He is content to explore independently but remains engaging and personable. He adjusts well to new environments and should transition easily into most any home.
- **Weight:** 3.50lbs

**Health Note:** Blue has a mild underbite that has been cleared by our veterinarian. It is expected to improve with growth and will not affect his daily life, comfort, or health.

---

## Molly Orange

- **Energy Level:** Mid to Moderate
- **Personality:** Orange is bubbly, social, and happy. He is well balanced and enjoys play and interaction with both people and littermates. His cheerful disposition and well-rounded temperament make him an easy fit for a variety of home types.
- **Weight:** 3.38lbs

**Health Note:** Orange has an umbilical hernia. This is a minor and common condition that can easily be corrected if necessary and does not affect his current health or well-being.
